

If you'd rather keep your pad as large as possible, pre-wash all your fabrics for this project. When bought new, waterproof mattress protectors can also shrink a bit with the first wash. Be warned.

INSTRUCTIONS :

1 - Cut all pieces : Choose template of your choice between A & B (pictured A), print twice and cut as advised.

Trace template onto each fabric. I use regular pens, as the outlines won't be visible in your final pad.
Cut along the lines : **seam allowance is included in the pattern.**
You have

- twice the outside template with the pretty outside fabric
- once the outside template with the waterproof fabric
- as many layers as desired of the inside template with the towel fabric (I suggest between 1 and 3 depending on thickness of towels, or it will be too difficult to sew)
